## DETAILED ACTION

### *Specification*

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claims 15-17 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim they must refer back to claims in the alternative. See MPEP § 608.01(n).

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1- 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 it is not clear what "C1 – C4 – alkylO \_" means. When Y is 0 –[C(R6)<sub>2</sub>]<sub>y</sub> does not exit.

In claim 3, it is not clear what CO – C6 – alkyl – phenol means.

In clam 17, it is not clear what 3-CO – C6 – alkyl means.

Claim 9 is rejected because there is no antecedent support in claim 1 for the claimed ester group.

Claims 15-17 are rejected because there is no antecedent support in claim 1 for the complex.

Claims 18 and 19 are rejected because claim 1 is not directed to a ligand but to a bleaching composition.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Appel (US 6,518,231).

Appel teaches a bleaching composition comprising an air bleaching catalyst substantially as set forth in the present claims. Apple teaches that the bleaching composition contains carriers, surfactants, detergent, etc (see col. 3, line 10 through col. 4, lines 43; col. 6 lines 1- 27),

Accordingly, Appel teaching all the limitation of the claims, anticipates the claims.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Apple (US 6, 518,231).

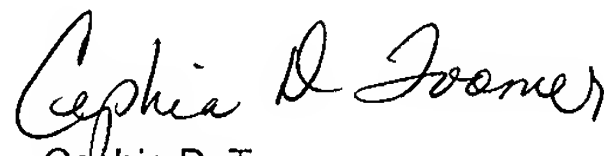

Appel has been discoursed above. Apple does not specification teach the salt of claim 20. However, it would have been obvious to one of ordinary skill in the art to have prepared the salt because Appel teaches the transition metal complex and he teaches that salts of the compound are within the scope of his invention (see col. 9, lines 48 – 59).

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references are cited for teaching bleaching compositions.
